Stratifi Landing Page - Product Requirements Document

1. Executive Summary

1.1 Product Overview

The Stratifi Landing Page is a conversion-focused website designed to showcase Stratifi's AI-powered DeFi agent capabilities and drive user acquisition. The page will serve as the primary entry point for users to understand, evaluate, and onboard to the Stratifi platform.

1.2 Objectives

- **Primary Goal:** Convert visitors to active users (wallet connections)
- **Secondary Goals:**
  - Educate users about DeFi optimization opportunities
  - Build trust in automated financial management
  - Demonstrate Stratifi's unique value proposition
  - Capture leads for beta/early access programs

1.3 Success Metrics

- **Conversion Rate:** 8-12% wallet connection rate
- **Engagement:** Average session duration >2 minutes
- **Bounce Rate:** <40%
- **Demo Interaction:** 60% of visitors interact with demos
- **Mobile Performance:** <3s load time on mobile

2. Target Audience

2.1 Primary Personas

Persona 1: DeFi Yield Farmer (40%)

- Experience: Advanced crypto user
- Pain Points: Time-consuming rate comparison, manual rebalancing
- Motivation: Maximize yields with minimal effort
- Behavior: Research-heavy, compares multiple platforms

Persona 2: Crypto Investor (35%)

- Experience: Intermediate crypto knowledge
- Pain Points: Missing optimal opportunities, risk management

- Motivation: Passive income generation, portfolio growth
- Behavior: Seeks trusted recommendations, values automation

Persona 3: DeFi Newcomer (25%)

- Experience: Basic crypto knowledge
- Pain Points: Complexity, fear of liquidation, lack of knowledge
- Motivation: Learn and earn safely
- Behavior: Education-focused, needs hand-holding

2.2 User Journey Mapping

```
Awareness → Interest → Consideration → Trial → Activation
Landing Page → Demo Interaction → Wallet Connection → First Position → Regular Usage
```

3. Functional Requirements

3.1 Core Features

3.1.1 Hero Section

Requirements:

- Compelling value proposition headline
- Live market data integration (APY rates, user count)
- Primary CTA: "Connect Wallet" with wallet detection
- Trust signals (audited, non-custodial, protocol count)

Technical Specifications:

- Real-time data updates every 5 seconds
- Wallet connection modal with 8+ supported wallets
- Responsive design for all screen sizes
- A/B testing capability for headlines and CTAs

3.1.2 Interactive Wallet Demo

Requirements:

- Simulated wallet connection experience
- Sample portfolio with realistic asset distribution
- Before/after optimization comparison
- Live rate comparison from 5+ protocols

Technical Specifications:

- Mock wallet data (ETH, USDC, WBTC, etc.)
- API integration with DeFi protocols for live rates
- Animated transitions between states
- Mobile-optimized touch interactions

3.1.3 Mode Comparison Section

Requirements:

- Research Mode vs Agent Mode comparison
- Interactive toggle between modes
- Feature matrix with visual indicators
- Mode-specific demo previews

Technical Specifications:

- Smooth transition animations between modes
- Embedded demo videos or interactive widgets
- Comparison table with hover effects
- Progressive disclosure of advanced features

3.1.4 Protocol Integration Showcase

Requirements:

- Visual representation of supported protocols
- Live rate aggregation display
- Integration status indicators
- Protocol-specific feature highlights

Technical Specifications:

- API connections to major DeFi protocols
- Real-time rate updates with caching
- Error handling for protocol downtime
- Filterable protocol grid

3.1.5 Trust and Security Section

Requirements:

- Security badge display (audits, certifications)
- Non-custodial wallet emphasis
- Smart contract information
- Insurance/protection details

Technical Specifications:

- Audit report integration
- Security score visualization
- Legal document links
- Compliance information display

3.2 Interactive Elements

3.2.1 ROI Calculator

Requirements:

- Input fields for portfolio size and risk tolerance
- Real-time calculation of potential returns
- Comparison with manual management
- Shareable results functionality

Technical Specifications:

- Dynamic calculation engine
- Multiple portfolio scenarios
- Export functionality (PDF/PNG)
- Integration with actual protocol rates

3.2.2 Risk Assessment Tool

Requirements:

- Interactive risk tolerance questionnaire
- Visual risk meter with explanations
- Personalized strategy recommendations
- Educational content for risk factors

Technical Specifications:

- Multi-step form with progress indication
- Risk scoring algorithm

- Responsive design for mobile completion
- Results storage for returning users

3.2.3 Live Demo Environment

Requirements:

- Sandbox environment mimicking real platform
- Sample transactions and rebalancing scenarios
- Real-time market condition simulation
- Guided tutorial overlay

Technical Specifications:

- Isolated demo environment
- Mock transaction processing
- Tutorial system with step-by-step guidance
- Demo reset functionality

4. Non-Functional Requirements

4.1 Performance Requirements

- **Page Load Speed:** <2s on desktop, <3s on mobile
- **Core Web Vitals:**
  - LCP (Largest Contentful Paint): <2.5s
  - FID (First Input Delay): <100ms
  - CLS (Cumulative Layout Shift): <0.1
- **API Response Time:** <500ms for rate updates
- **Animation Performance:** 60fps on modern devices

4.2 Security Requirements

- **HTTPS Enforcement:** All connections encrypted
- **Wallet Security:** No private key storage/transmission
- **Data Privacy:** GDPR/CCPA compliant data handling
- **Content Security:** CSP headers implemented
- **External Integrations:** Whitelist approved domains only

4.3 Accessibility Requirements

- **WCAG 2.1 AA Compliance:** All interactive elements accessible

- **Keyboard Navigation:** Full site navigable without mouse
- **Screen Reader Support:** Semantic HTML and ARIA labels
- **Motion Preferences:** Respect prefers-reduced-motion
- **Color Contrast:** Minimum 4.5:1 ratio for text

4.4 Browser Support

- **Desktop:** Chrome 90+, Firefox 90+, Safari 14+, Edge 90+
- **Mobile:** iOS Safari 14+, Chrome Mobile 90+
- **Progressive Enhancement:** Core functionality without JavaScript
- **Graceful Degradation:** Fallbacks for unsupported features

5. Technical Architecture

5.1 Frontend Stack

- **Framework:** Next.js 14 with React 18
- **Styling:** Tailwind CSS with custom components
- **Animation:** Framer Motion + GSAP for complex animations
- **State Management:** Zustand for global state
- **Wallet Integration:** RainbowKit + Wagmi

5.2 Backend Integration

- **API Gateway:** RESTful APIs with GraphQL for complex queries
- **Real-time Data:** WebSocket connections for live updates
- **Caching:** Redis for rate data caching
- **Analytics:** Custom event tracking + Google Analytics 4

5.3 Third-Party Integrations

- **DeFi Protocols:** Direct API integration with major protocols
- **Wallet Providers:** MetaMask, WalletConnect, Coinbase Wallet
- **Analytics:** Mixpanel for user behavior analysis
- **A/B Testing:** Optimizely or custom solution
- **Error Monitoring:** Sentry for error tracking

5.4 Deployment Architecture

- **Hosting:** Vercel with edge computing
- **CDN:** Cloudflare for global content delivery

- **Domain:** SSL certificate with custom domain
- **Monitoring:** Uptime monitoring with alerts

6. User Experience Requirements

6.1 Navigation and Information Architecture

```
Landing Page Structure:
├── Hero Section
├── Value Proposition
├── Interactive Demo
├── Mode Comparison
├── Protocol Showcase
├── Trust & Security
├── How It Works
├── Testimonials
├── FAQ
└── Footer with CTA
```

6.2 Content Strategy

- **Tone of Voice:** Professional yet approachable, technical but accessible
- **Content Hierarchy:** Benefits first, features second, technical details third
- **Educational Content:** Tooltips and expandable sections for DeFi concepts
- **Localization:** English primary, with framework for future translations

6.3 Mobile Experience

- **Mobile-First Design:** Optimized for touch interactions
- **Simplified Navigation:** Collapsible menu with clear sections
- **Touch Targets:** Minimum 44px touch targets
- **Offline Capability:** Basic content available offline

7. Analytics and Tracking

7.1 Conversion Tracking

- **Wallet Connection Events:** Track successful connections by wallet type
- **Demo Interactions:** Measure engagement with interactive elements
- **Form Submissions:** Newsletter signups, beta access requests
- **CTA Clicks:** Track all call-to-action button interactions

7.2 User Behavior Analytics

- **Scroll Depth:** Measure how far users scroll on landing page
- **Time on Section:** Track engagement with different page sections
- **Heat Maps:** Visual representation of user interaction patterns
- **Session Recordings:** Sample user sessions for UX insights

7.3 Performance Monitoring

- **Real User Monitoring:** Track actual user experience metrics
- **Error Tracking:** Monitor and alert on JavaScript errors
- **API Performance:** Track response times for all integrations
- **Conversion Funnel:** Identify drop-off points in user journey

8. Content Requirements

8.1 Copy and Messaging

- **Headlines:** A/B test 3 variations of main headline
- **Value Propositions:** Clear, benefit-focused messaging
- **Educational Content:** Explainer text for DeFi concepts
- **Social Proof:** User testimonials and success stories
- **FAQ Content:** Address common user concerns and questions

8.2 Visual Assets

- **Hero Graphics:** Custom illustrations showcasing DeFi concepts
- **Protocol Logos:** High-resolution logos for all integrated protocols
- **Demo Screenshots:** Up-to-date interface screenshots
- **Infographics:** Visual explanations of complex processes
- **Video Content:** Product demo videos under 2 minutes

8.3 Legal and Compliance

- **Terms of Service:** Clear terms for platform usage
- **Privacy Policy:** GDPR/CCPA compliant privacy documentation
- **Risk Disclosures:** Clear warnings about DeFi risks
- **Regulatory Notices:** Compliance with relevant jurisdictions

9. Testing and Quality Assurance

9.1 Functional Testing

- **Cross-Browser Testing:** Verify functionality across all supported browsers

- **Mobile Testing:** Test on real devices (iOS/Android)
- **Wallet Integration:** Test all supported wallet connections
- **Form Validation:** Ensure all forms handle edge cases properly

9.2 Performance Testing

- **Load Testing:** Simulate high traffic scenarios
- **Stress Testing:** Test system limits and recovery
- **API Testing:** Verify all third-party integrations
- **Accessibility Testing:** Automated and manual accessibility checks

9.3 User Acceptance Testing

- **Beta User Testing:** Test with sample users from each persona
- **Usability Testing:** Observe users completing key tasks
- **A/B Testing:** Test different versions of key elements
- **Feedback Collection:** Gather and implement user feedback

10. Launch Plan and Timeline

10.1 Development Phases

Phase 1: Foundation (Weeks 1-2)

- Project setup and architecture
- Basic layout and navigation
- Hero section implementation
- Wallet connection integration

Phase 2: Core Features (Weeks 3-5)

- Interactive demo development
- Mode comparison section
- Protocol integration showcase
- ROI calculator implementation

Phase 3: Enhancement (Weeks 6-7)

- Animation implementation
- Mobile optimization
- Performance optimization
- Security implementation

Phase 4: Testing and Launch (Weeks 8-9)

- Comprehensive testing
- User acceptance testing
- Performance monitoring setup
- Soft launch and feedback collection

10.2 Success Criteria

- **Technical:** All functional requirements met
- **Performance:** Meet all performance benchmarks
- **Accessibility:** Pass WCAG 2.1 AA compliance
- **User Testing:** 80%+ task completion rate in user testing
- **Stakeholder Approval:** Sign-off from all key stakeholders

11. Post-Launch Optimization

11.1 Continuous Improvement

- **A/B Testing Program:** Ongoing testing of key elements
- **User Feedback Integration:** Regular user survey and feedback collection
- **Performance Monitoring:** Continuous optimization based on real user data
- **Content Updates:** Regular updates to rates, protocols, and features

11.2 Feature Roadmap

- **Advanced Filtering:** More sophisticated portfolio filtering options
- **Personalization:** User-specific recommendations and content
- **Social Features:** Community testimonials and social sharing
- **Educational Content:** Expanded learning resources and tutorials

11.3 Maintenance and Support

- **Regular Updates:** Monthly content and feature updates
- **Security Monitoring:** Ongoing security assessment and updates
- **Performance Optimization:** Continuous performance improvements
- **Bug Fixes:** Regular maintenance and issue resolution
